MOTOROLA SOLUTIONS VB400 BODY-WORN CAMERA FOR SECURITY PROFESSIONALS

BODY-WORN CAMERA INTEGRATION FOR LIVE, FIRST-PERSON RECORDING & STREAMING

Workplace violence is rising, and with that come higher demands on Security Personnel. From corporate offices and retail outlets to hospitals and schools, Security Personnel are employed to protect people and physical assets from violence and malicious damage.

The Motorola Solutions VB400 body-worn camera has been designed for front-line workers who regularly encounter threats of abuse. With its rugged exterior and shift-long recording, the VB400 provides footage of events as they occur, allowing immediate response and providing indisputable evidence.

When implemented alongside fixed-video deployments and integrated with Avigilon Control Center (ACC), activation of a VB400 camera generates a motion start event in ACC software and displays the camera's live video feed to the system operator alongside video feeds from fixed cameras.

BUILT FOR DURABILITY

With its ruggedized exterior, IP67 rating and selection of mounts and fixings to accommodate any uniform type, the VB400 is tested to military standards and is robust enough for any situation.

CONNECTED

Whether you're streaming live footage to ACC, or activating multiple cameras using Bluetooth sensor monitoring, the VB400 is connected for an efficient and smarter response.

PEER-ASSISTED RECORDING

If enabled, staff wearing VB400s can ensure their cameras begin recording when in the presence of an already recording VB400 providing situational awareness and a viewpoint that backs the officer's claims.

CAPTURES VITAL CONTEXT

Using configurable pre and post-record functions, users can be confident that the full incident will be captured, regardless of how unexpected and when they activate recording.

DETERS AGGRESSION & PROVIDES ASSURANCE

Wearing a VB400 can deter aggression and alter behavior before situations escalate. In instances where footage is required for evidence, video captured provides an unbiased view in 1080p HD.

EASY TO USE

From assigning a camera and recording footage to offloading video and creating incidents and cases, the VB400 & associated software are simple to use, easy to integrate and designed for every-day use.
