

# H4 LPC CAMERA

## ACCURATE LICENSE PLATE CAPTURE AT A RANGE OF DISTANCES & SPEEDS

The H4 License Plate Capture (LPC) camera is designed to read license plates at typical vehicle speeds, even in challenging lighting conditions. Using infrared (IR) illumination and visible light filtering, H4 LPC cameras enable Avigilon License Plate Recognition (LPR) analytics to accurately identify license plate characters from a range of distances.

### WORKS WITH AVIGILON CONTROL CENTER (ACC) SOFTWARE

Enables Avigilon LPR analytics to automatically read license plate information and link it to live and recorded video in ACC™ software.

### MULTIPLE INSTALLATION OPTIONS

4.7–84 mm varifocal lens, multiple included IR illuminator lens options and POE+ for all components enable flexibility between different installation scenarios.

### GREATER ACCURACY AT HIGHER SPEEDS

Allows license plate capture at vehicle speeds up to 100 km/hr (62 mph).

### INTEGRATED IR ILLUMINATION & VISIBLE LIGHT FILTERING

Gives the camera much greater depiction of characters on reflective number plates.

### WEATHER RATED

IP66 weather rating from -30–50°C (-22–122°F) allows for reliable operation in challenging climates.
