

# AVIGILON PRESENCE DETECTOR (APD) SENSOR

## ACCURATELY DETECT THE PRESENCE OF A PERSON

The Avigilon Presence Detector™ is a small form-factor impulse radar device with self-learning radar analytics that helps to solve the challenge of human presence detection in indoor areas where traditional devices may be limited. The APD™ sensor provides extremely high accuracy at distances up to 9 meters (30 feet) from the sensor, even if the person is hidden or obstructed by objects such as blankets, cardboard, wood, or drywall.

### COMPLETE PRIVACY

Using radar technology for detection, the APD sensor ensures complete privacy as it does not capture or display items such as ATM keypads or faces.

### VMS INTEGRATION

Integrates with any video management software to provide accurate alarm notifications of important events so that you can take action.

### IMPULSE RADAR TECHNOLOGY

Effectively detects people even when they are not moving, while also being able to detect fine motion, such as breathing, to alert you of the presence of a person.

### EASY INSTALLATION

Available in surface, corner or wall mount options, the APD sensor uses standard IP security camera infrastructure and cabling.

### RELAY I/O CONNECTIONS

Configure input/output actions and alarms for fast event response.
